

Collection

Robini

New exclusive series of devices created for very demanding users. Interesting and difficult to overcome entrances, several climbing walls, challenging passages stimulate action, require planning of movements and hence push the children to overcome obstacles. Massive, stainless steel construction poles, beautiful and durable acacia wood give this play line an unusual appearance and a prestigious character.

- **round poles of high-quality stainless steel mounted directly in the ground,**

- **all wooden elements made of extremely strong, weather-resistant acacia wood - robinia, protected with colourless glaze**

- **stainless steel connectors and slides,**
- **weatherproof polypropylene ropes with a steel core**

1
